

We enjoy listening to K-LOVE FM on 106.7 FM here in Raleigh, NC, and are concerned that this signal may be displaced by a Low Power FM broadcaster if the FCC allows LPFM stations to take priority over FM translators.

K-LOVE serves us here in the local community by broadcasting news of local events and upcoming activities of interest to our area. We also hear about local concerts and volunteer opportunities, along with great music nobody else in our listening area broadcasts.

If K-LOVE was displaced by a low power FM station, there is no one broadcasting the information and music K-LOVE carries, and our community would greatly suffer.

I believe that the service provided by K-LOVE is in the public interest because of the way it connects our local towns and municipalities, and groups from many different organizations and cultures. Please do not allow a low power FM station to replace our K-LOVE!

Many thanks
